

## Discover the secret ingredient to younger looking skin

Discover the secret ingredient to younger looking skin Ceramide and Vitamin E Skin Oil from Africa Media Release - May 2019 We all want younger looking skin, so it's never too early to prevent the visible signs of ageing. Thanks to BodyPlus Skin Oil you can now keep those wrinkles at bay to ensure your skin remains looking soft and youthful for longer! CEO of McGloins Supertex Nick Barnes says, "It's so important to look after our skin no matter what age you are. You can also use it when you're young to keep skin looking amazing, or when you're older as the active ingredients ceramide and Vitamin E inject moisture into the skin to help rewind the effects of ageing". The secret lies within BodyPlus Skin Oil's active ingredient ceramide, which works to capture and bind moisture to hydrate the skin and reduce the appearance of wrinkles and age lines. BodyPlus Skin Oil is also enriched with Vitamin E, which aids in the prevention of dry and flaky skin. Ceramide has long been used as an anti-ageing agent as it helps repair and rejuvenate the skin's natural defence barrier to protect the skin and increase moisture retention. Ceramide is found naturally in the outer layer of the skin but ceramide levels decline with age, leaving skin looking tired and dry. Key benefits and various uses of BodyPlus Skin Oil include: Everyday moisturiser Safely treats stretch marks Treats sunburn Lightens dark spots Heals drying fingernails Reverses premature skin ageing Acts as cleansing agent Soothes pain from cold sores Suitable for men and women of all ages Helps to treat eczema BodyPlus Skin Oil works best when applied twice a day for at least three months. High in Vitamin E and Ceramides, use BodyPlus as an intensive face and body moisturiser, bath oil or after sun treatment. BodyPlus Skin Oil is available at Chemist Warehouse, selected pharmacies or online at [www.mcgloins-supertex.com.au](http://www.mcgloins-supertex.com.au) for an RRP of \$19.95.
