

Eaton expands Moeller® range with new easyE4 control relay

Flexibility and large voltage range to benefit business and industrial applications

SYDNEY, AUSTRALIA. Power management company Eaton today announced an expansion to its Moeller® range, with the launch of the new easyE4 control relay in Australia and New Zealand. Designed for installers who want to easily integrate control tasks for business and industrial applications, the easyE4 is more compact than previous models, and has flexible options that can connect up to 11 modules and a maximum of 188 inputs/outputs. Mark Anning, Eaton General Manager ANZ said the powerful hardware, flexible expansion and comprehensive communication options of the easyE4 range, makes it one of the most versatile control relay options in the market. “The easyE4 has a large voltage range (DC, AC and UC) with mixed operation flexibility to suit a wide range of applications and markets – from plumbers in building installations, right through to automation engineers in machine building applications. “Backed by Eaton’s intuitive easySoft programming software, the easyE4 can handle simple control tasks, right through to comprehensive configurations with high process efficiency. New function blocks include email notification and an interrupt function which enables fast event recognition and rapid response times. “When used in combination with other products from the Eaton portfolio, the easyE4 can also be integrated into IIoT system architectures via the integrated ethernet interface – a critical feature in the era of advanced manufacturing and automation.” The easyE4 comes with optional DCF77 radio signal analysis and ethernet services which enable highly precise data and time indication. While the integrated micro SD card facilitates data logging and customised starter programs. The software includes four programming languages including structured text (ST) and function block diagram (FBD). With a variety of unique display and visualisation options available for users on mobile devices, tablets or laptops. The easyE4 is available in various supply voltages: AC version for 85 V to 264 V DC version for 24 V UC version for 12 V DC, 24 V DC or 24 V AC Available today through leading electrical wholesalers across Australia.
