

Exclusive Australian Distributor of AirClad

Expo Centric announced as exclusive Australian distributor for AirClad's innovative and 100% reusable event structures

Expo Centric announced as exclusive Australian distributor for AirClad's innovative and 100% reusable event structures.

The events and exhibition industry is down for the count while global community fights this insidious Covid-19 pandemic. Researchers around the world are furiously working towards a vaccine and each passing day, success looks more likely.

Expo Centric realises that once the global community gains the upper hand, events and exhibitions will not be the same. It is from this starting point that Expo Centric scoured the world for innovative products that could assist its clients in a post Covid world. Our key criteria were that the product must be innovative, reusable, quick to install and dismantle, able to be used outdoors and importantly visually engaging.

AirClad meet and exceeded our wildest hopes! It is with great pleasure that Expo Centric announces the exclusive Australian distributorship for the AirClad range of products.

The AirClad range of products are 100% reusable, designed to maximise the efficiency of the materials used, can be used indoors and outdoors, fast setup and dismantle and are customisable to meet a client's branding requirements. Expo Centric will be introducing the following AirClad products to the Australian events and exhibition space:

AirClad XPO6

AirClad YUMI

AirClad OIO (Office in Office)

AirClad XTRL

AirClad XPO6 – The AirClad XP06 is a great way to step away from the traditional connotations of frame marquees. Being a modular system, the AirClad XPO6 can slot perfectly into any brand guides to suit a multitude of marketing applications.

AirClad YUMI – The YUMI is the perfect pop-up kiosk or serving station for any event. It's simple, stylish front fascia and clean lines give a distinctive, graphic look - complementing any brand, product or service. It features a 1.5m wide serving hatch that creates an integrated awning when open.

AirClad OIO (Office in Office) - The OiO has been developed in response to growing demand for mobile offices and adaptable workspaces, however its uses are unlimited and to date has been deployed as everything from presentation display spaces, to mobile hairdressing salons.

AirClad XTRL – The AirClad XTRL is a mobile, trailer- mounted structure and is ideally suited to touring events where a pre-built solution is required. Complete with integrated lighting and uniquely designed features for wall- mounted accessories and graphics, the interior space is open-plan and ready for an interior fit out.

Expo Centric's introduction of the AirClad products to the Australian events and exhibition space provides our clients an opportunity to easily take their promotion to where the client are, and not solely rely on large exhibitions.
