

ExtraHop Expands Network Detection and Response Capabilities in Asia Pacific Region

Opens Data Centre in Australia to Meet Security Market Demand

SYDNEY – 8 February, 2021 – ExtraHop, a leader in cloud-native network detection and response, today announced new data centre investments in Australia to enhance access to its cloud-native security platform, Reveal(x) 360, across the Asia Pacific region.

Reveal(x) 360 (Reveal(x) 360) is network detection and response built to secure modern enterprises against increasingly advanced threats. Reveal(x) 360 sensors can be deployed in any cloud or on-premises environment to provide complete visibility, real-time threat detection, and intelligent response across multi-cloud and hybrid deployments. With zero management overhead and an on-demand consumption model, Reveal(x) 360 makes it easy to scale to meet organisational security requirements. With the addition of new data centre facilities in Australia to host Reveal(x) 360 locally, ExtraHop delivers higher availability and reduced latency while ensuring that customers preserve the sovereignty of their data.

David Sajoto, ExtraHop's Vice President of Asia Pacific and Japan, said, "Organisations around the world are rethinking their approach to security as advanced threats like APTs and software supply chain attacks take a financial and reputational toll. At ExtraHop, we're committed to providing our customers with the machine learning-backed detection and response capabilities that put public and private sector security teams back in the driver's seat when it comes to protecting their organisations. That commitment includes investing in the markets we serve to ensure that our customers have access to high-availability, low-latency security capabilities that meet local standards for data sovereignty and protection. This investment affirms our commitment to the region and our customers."

Reveal(x) 360 is available immediately in the Asia Pacific region. To experience Reveal(x) 360, check out the live interactive online demo:

About ExtraHop

ExtraHop is on a mission to arm security teams to confront active threats and stop breaches. Our Reveal(x) 360 platform, powered by cloud-scale AI, covertly decrypts and analyses all cloud and network traffic in real time to eliminate blind spots and detect threats that other tools miss. Sophisticated machine learning models are applied to petabytes of telemetry collected continuously, helping ExtraHop customers to identify suspicious behaviour and secure over 15 million IT assets, 2 million POS systems, and 50 million patient records. ExtraHop is a market share leader in network detection and response with 30 recent industry awards including Forbes AI50, Cybercrime Ransomware 25, and SC Media Security Innovator.
