

Fantastic Services Group launches a new Antiviral Sanitisation Service in Australia

The Fantastic professionals received their Infection Control Training certificate from the Australian Government Department of Health

Fantastic Services Australia has launched a new Antiviral Sanitisation service amidst the global outbreak crisis and in response to the high demand for prevention and disinfection against the COVID-19 virus.

The antiviral property sanitisation treatment is available to domestic, commercial and public-sector customers in Melbourne, Sydney and Perth.

Key points of the new service:

- All professionals passed the Infection Control Training from the Australian Government Department and received a certificate;
- It is performed with certified non-toxic virucidal detergent products;
- The technicians wear protective gear and have been specially trained to perform the service;
- The treatment is effective against a range of viruses and bacteria.

The co-founder of Fantastic Services, Rune Sovndahl, says that the company's management has been closely monitoring the development of the health crisis in both Australia and the UK. The new Antiviral Sanitisation service is one of the Fantastic Services' contributing efforts to keep homes and places of work and business safe.

"We have taken all necessary measures to make this service as safe as possible. All technicians follow strict daily routines to ensure their personal safety,"

The Antiviral Sanitisation service is provided with the use of a certified virucidal detergent, which is child and pet-safe. It has been tested and proven to neutralise effectively a number of viruses and bacteria on "high-touch", washable surfaces. The property disinfection treatment can be booked online through the Fantastic Services Group's website or the mobile application - GoFantastic.

The technicians, who perform the service, have been trained to execute the antiviral sanitisation treatment as safely as possible by following strictly personal hygiene practices and the company's high-quality standards.

Fantastic Services Australia endeavours to assure its customers that all cleaning and property maintenance services, it provides, are available and performed with the highest level of quality and safety amid the current outbreak situation.
