

# Digitising Cemetery Maps and Records Free Webinar for NSW Cemeteries

A Modern Look on Digitising Cemetery Maps and Records

Digitising cemetery records and maps are two things we are currently professionally doing. And we are interested in sharing to the community, the urgency of getting your cemetery records and maps better managed. We are conducting a free webinar, not only for the one who resides on Australia, but the whole world.

We know how important it is to keep the records accurate over the decades (or even centuries). We know digital is the way to go, and the way the next generation of cemetery managers will do it.

November 13, 2020 | 3.00 PM AEDT
