

Genetec makes its digital evidence management system available at no-cost to help organisations collaborate remotely

Organisations can receive free access to Genetec Clearance until December 31st, 2020 to facilitate sharing of digital evidence between public safety organisations, businesses, and citizens

SYDNEY, AUSTRALIA/MONTRÉAL, April 9, 2020— Genetec Inc. (“Genetec”), a leading technology provider of unified security, public safety, operations, and business intelligence solutions today announced that it is making its digital evidence management system, Genetec Clearance™ (Clearance), available free of charge to any organisation looking to efficiently share digital evidence, from wherever they are. Genetec Clearance allows organisations to manage and distribute media and files from surveillance systems, body cameras, cellphone footage from bystanders and witnesses, and other sources, while avoiding the need to create or distribute physical copies. Public safety agencies, and other organisations are having to quickly adopt new strategies to address the changes to daily operations to allow them to continue to collaborate with different stakeholders in order to fight crime and solve cases faster. They need to implement precautions to ensure the wellbeing of officers, first responders, their staff and the public. To assist organisations to continue to work together effectively when remote, Genetec is making Clearance available at no cost until December 31st, 2020. Video is a valuable tool to solve crimes, but receiving video often requires officers or other staff to go on-site and collect recordings on USB or disks. With Genetec Clearance, access to case and incident information can be shared with authorised stakeholders at the click of a button, while preserving all user activity to maintain the chain of evidence. There are no file size restrictions in the application, and videos are automatically converted to a browser-friendly format, avoiding the need for recipients to download and install standalone video players. Organisations who sign up for a new Genetec Clearance trial account will be provided a free, personalised remote on-boarding session to assist with the configuration of the account and walkthrough of the application. General sessions focused on Genetec Clearance are also planned during the Genetec DX virtual trade show (April 20-22nd 2020) and more detailed webinars are scheduled on Wednesday April 29th, Thursday May 7th, Wednesday May 13th and Wednesday May 20th. --ends-- About Genetec Genetec Inc. is an innovative technology company with a broad solutions portfolio that encompasses security, intelligence, and operations. The company’s flagship product, Security Center, is an open-architecture platform that unifies IP-based video surveillance, access control, automatic license plate recognition (ANPR), communications, and analytics. Genetec also develops cloud-based solutions and services designed to improve security, and contribute new levels of operational intelligence for governments, enterprises, transport, and the communities in which we live. Founded in 1997, and headquartered in Montreal, Canada, Genetec serves its global customers via an extensive network of resellers, integrators, certified channel partners, and consultants in over 80 countries.
