

Global software powerhouses TechnologyOne and Microsoft partner to deliver cloud first, mobile first world

Brisbane, 09 December 2015 -- Leading enterprise software providers TechnologyOne (ASX:TNE) and Microsoft Corporation have announced a new partnership at Microsoft's 2015 Connect Conference in New York City.

Microsoft unveiled its new Microsoft Graph API to a global audience, detailing how it would integrate Microsoft Office 365 with TechnologyOne's Enterprise Content Management (ECM) solution.

This integration will provide simple, automated capture of emails from Microsoft Outlook into ECM, tagging the email in Outlook without requiring any additional software installs.

TechnologyOne Executive Chairman Adrian Di Marco said it was a great initiative for both organisations, emphasising the importance of the Research & Development organisations working together to deliver a cloud first, mobile first world.

"This is a big step in our joint commitment to integrating Office 365 with our enterprise software," Mr Di Marco said.

"It provides a clear path forward for customers who wish to use Office 365 with our software, enabling us to deliver on our promise of transforming business and making life simple for our customers.

"This collaboration with Microsoft, and our focus on customer experience, demonstrates our ongoing commitment to research and innovation here at TechnologyOne."

Microsoft has launched a website showcasing its nine new Microsoft Graph API partners, with TechnologyOne as the only enterprise software provider included among the list of cloud-based vendors.

About TechnologyOne

TechnologyOne (ASX:TNE) is Australia's largest enterprise software company and one of Australia's top 200 ASX-listed companies, with offices across six countries. We create solutions that transform business and make life simple for our customers. We do this by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,000 leading corporations, government departments and statutory authorities are powered by our software.

We participate in only eight key markets: government, local government, financial services, education, health and community services, asset intensive industries, project intensive industries and corporates. For these markets we develop, market, sell, implement, support and run our preconfigured solutions, which reduce time, cost and risk for our customers.

For 28 years, we have been providing our customers enterprise software that evolves and adapts to new and emerging technologies, allowing them to focus on their business and not technology. Today, our software is available on the TechnologyOne Cloud and across smart mobile devices.
