

# Gold Coast Website Designer Develops New Website for Gold Coast Car Sales

Southport-based Gold Coast Car Sales is a car dealership that allows customers to buy and sell used cars. The company is all set to unveil its all-new, smart and mobile-friendly website designed by Gold Coast Web Designer.

Gold Coast Car Sales assigned its website designing project to Gold Coast Website Designer in Jan 2017. The newly developed website is ready for launch. The link is: <http://goldcoastcarsales.com.au>

The architecture of the website is user-friendly. It neatly features a marketplace for cars displaying clear and bright images of several pre-owned cars. The menus in the header section give precise indications about the content they lead to. This helps users find all the pages instantly. The important segments are 'USED CARS FOR SALE' and 'SELL YOUR CAR'.

The placement of all the buttons is done appropriately to minimize hovering errors or wrong clicks. The social sharing and call to action buttons are prominently visible on the home page, so a visitor does not need to hunt for them.

Most importantly, the website brings forth all the advantages of WordPress, it is equipped with secured user login.

Therefore, Gold Coast Car Sales has a highly functional and attractive website. Gold Coast Web Designer has been able to satisfy its client with a responsive and SEO-friendly website to earn optimum user engagement that results in ROI.
