February 2020

For Immediate Release

Greenlight ITC Presents “Cybersafety Brunch and Learn 2020”

Chatswood, NSW – Greenlight ITC in Collaboration with Holman Webb Lawyers and Datto will present “Cybersafety Brunch and Learn 2020” on February 21, 2020: an invite-only learning event aimed to empower you with the tools and strategies to protect your business from the latest wave of Cyber Threats this 2020. With more and more businesses reporting ransomware attacks in the last few years and 60% of targeted attacks striking small and medium businesses[1], creating a layer of protection has been more and more essential for businesses of any shape or size.

On top of this, they are providing complimentary and secure dark web scans for the first 30 attendees (valued at \$499). The event is exclusive for businesses in New South Wales.

The event will be featuring the following speakers and presentations:

- What is the Dark Web? 8 Simple steps businesses can take to protect their data.

Speaker: David Gorton, Service Delivery Manager in Greenlight ITC. David has been in the IT industry for over 30 years from health, local council, NSW government, and the Federal government. Now he's focused on teaching people how to be more cybersafe.

- Preventing Cyber Breaches Policies and documents to assist your business in satisfying its legal obligations.

Speaker: Tal Williams, Partner at Holman Webb Lawyers. Tal practices general commercial and corporate law, with a special focus on technology. He has been named as a Legal Hotshot in that space by Lawyers Weekly in 2016.

- How your disaster recovery strategy can defend against Ransomware.

Speaker: Peter Eldon - Strategic Account Manager, Datto. Datto offers business continuity and disaster recovery, networking, business management, and file backup and sync solutions to half a million businesses across more than 130 countries.

To register, call 02 8142 0000 to express your interest.

Greenlight ITC – With over 16 Years of Experience in the industry growing small-medium businesses through the latest technologies and managed services, Greenlight ITC is a managed services company that aims to empower you through technology.

At Greenlight ITC, our clients don't work with us because we're the biggest managed services provider in Australia. They come to us because we are large and experienced enough to deliver professional quality, but small enough to deliver a custom, personalized service. We can and will help the business metrics that matter to you. If we can't, we'll be transparent about it.
