

# Herbal Ignite For Him For Erectile Dysfunction

Don't panic if you are experiencing an inability to perform in the bedroom – mild and moderate erectile dysfunction affects approximately 10 percent of men per decade of life (i.e., 50 percent of men in their 50s, 60 percent of men in their 60s).

Erectile dysfunction may occur at any age and is more common in older men who are more likely to have health conditions requiring medication that may impact erectile function.

In men the key sex hormone is testosterone. Testosterone can affect many different aspects of a man's overall health, including energy level, mood, libido (sex drive), strength and sexual function.

Low testosterone is a condition that generally occurs as men age. In some men, that decline is faster than in others. Certain medical conditions and medications can affect testosterone levels.

The good news is that some lifestyle changes may help erectile dysfunction.

Regular exercise, a healthy diet, no smoking and only moderate alcohol consumption, amongst other lifestyle changes, may improve erectile dysfunction.

You may also be confused by the situation, not feeling great and not really knowing where to turn or what to do about the issue, but ED can be improved. Herbal Ignite for Him is a 100% natural herbal formula that works to help the underlying cause of erectile dysfunction and low sex drive in men. It is made in New Zealand and there are no nasty headaches, no injections, usually \* does not interfere with other medications and there is no prescription required.

Read this testimonial from Murray B.

"I have been taking 4 herbal ignite each day since about March this year. Other prescription medicines did not work for me. My erections were often not very strong, and often failed to allow penetration. Since taking your herbal ignite however I have very strong erections, great lasting power, and never fail to reach orgasmic pleasures. I shall continue to take my herbal ignite whilst I feel I have such great sex drive again, there are no side effects for me, other than experiencing frequent early morning wake up erections like I used to get as a teenager."
