

How Cemetery Software Can Help Meet OVIC's New Regulations

How Cemetery Software Can Help Meet OVIC's New Regulations

In our first webinar of 2021, we analyse the OVIC requirements for cemeteries and discuss options for how to implement your Protective Data Security Plan (PDSP).

We'll be live on Thursday, 28 January at 2pm AEDT, so make sure to save your seat!

In this webinar for Victorian cemeteries, we will primarily focus on these OVIC fundamentals:

How to keep your information safe and secure. How to ensure your records and maps are accurate. How to share cemetery information with the public. How cemetery mapping and software can help. The webinar will finish with questions and an open discussion with all participants.

Register for our webinar today, and learn how to meet the OVIC requirements with the most suitable tool for your cemetery! [Click the link here](#)

Chronicle is a simple cemetery management software, designed to promote community engagement and maintain cemetery records with ease.
