

How partnering with ACS can earn your business some extra income

We have a new Agent option that makes it easy to add an additional income stream to your business or website.

We have just released a new option for companies to sell our short courses and ebooks using a customised webpage that you can link straight from your website.

When your customers make a purchase, we process the orders, take the payment and pay you 35% commission from every sale. We then deliver the course and service the student; there is no work for you to do.

This model would be ideal for anyone who would like to add an additional income stream to their business/ blog.

This agent option has no start-up costs, no risks and it is simple to apply. There are many benefits to adding this to your business. We do all of the work- including payments, course delivery, customer service, administration. Storefronts can be in GBP£ or AUD\$. You get your commission paid monthly (once you generate a minimum of \$300 or £200- otherwise it is rolled over to the next month). You can promote the products how you like- social media, on your website, newsletter, blog- the more you sell, the more income you will receive.

Would you like to know more or apply? Find out more here:
