

Indigo Designs makers of original ottomans designed and made in Australia

[Just launched their online store](#)

Indigo Designs have just launched their online store; they make stylish, original hand-made ottomans and cushions that will look great in your home and office. They also offer free delivery on their ottomans within Australia. Established in 2013, Indigo Designs is an independent company based in Bulimba, QLD Australia. Owner and designer, Paula McKay says "All our products are totally unique and are designed and hand-made to the highest standard by us. We have worked hard to source high quality materials from local manufacturers, like the foam and cushion inserts so we can be sure of the quality and consistency."

"Last year I moved house and was looking for something special and affordable to complement our existing furniture. I was looking at ottomans as they are so versatile and I really wanted to make a statement in our home. I just couldn't find what I was looking for, so decided to create my own ottoman. Having received so many great comments and requests to make them for family and friends, Indigo Designs was launched," says Paula. Our autumn collection uses fabrics by Holli Zollinger, artist and fabric designer. She has a great sense of style and the graphic bold patterns have a retro feel that would suit most interiors.
