

InfoTrack named finalist in Best Legal Tech Project award for Transition to e-Conveyancing Care Package

InfoTrack has been recognised as a finalist at the YBF Venture's Startup and Innovation Awards 2020

InfoTrack has been recognised as a finalist at the inaugural YBF Venture's Startup and Innovation Awards 2020.

The awards acknowledge and celebrate the startups, scaleups and global leaders that are innovating during the pandemic-induced crisis of 2020. In each industry category, a small, elite list of innovators were recognised.

InfoTrack's Transition to e-Conveyancing COVID-19 Care Package ranked as a finalist for Best LegalTech Project, Product or Pivot. The Care Package has assisted many lawyers and conveyancers to transition to remote working during the height of the COVID-19 pandemic.

InfoTrack CEO John Ahern said, "We're excited to be ranked as a finalist for our Care Package. At the height of the COVID-19 pandemic, our aim was to assist our clients with transitioning to digital processes as quickly as possible. Overnight, legal technology became a necessity as lawyers and conveyancers could no longer meet clients face to face. They needed smart technology solutions to help them maintain business as usual."

YBF Ventures explicitly acknowledged InfoTrack's e-signing solution SignIT, as supporting lawyers and conveyancers to continue business as usual. The number of cost agreements, electronic contracts and other legal documents being electronically signed increased significantly during COVID-19 as lawyers and conveyancers have reduced capacity to meet clients in person.

InfoTrack has a strong history for their leading legal technology innovations. In 2019, InfoTrack took home awards for Most Innovative Company, Employer of Choice, Service Excellence and Best Managed Company.

"Creating the Care Package was our way of supporting our clients through a challenging time," Ahern explained. "We wanted to make sure they knew they could access our cloud-based solutions anywhere at any time."

"We're very grateful for this recognition," Ahern continued. "Accolades like this inspire us to continue to service the legal industry well. We promise to continue to develop smart, innovative technology to help our clients remain productive and efficient."
