

# Internet Marketing Education Accessible to all with new Join Up Grant

Internet Marketing Education is now accessible to all with the introduction of the Join Up Grant. By making the joining fee for the course much cheaper, the education is now accessible to more than 90% of the population - increasing Business Academy Online's market share.

Internet Marketing Education is now accessible to all with the introduction of the Join Up Grant by Business Academy Online. The Join for \$1 initiative means that potential students can join the #1 program for a nominal amount.

Previously the course was unavailable to many because of the related time-frames and cost, however this has been addressed by co-founders Nicci Barnes and Lee Bush.

Business Academy Online's Internet Marketing Education program now offers a 12 week online course - that students can start for \$1.

The online format, preferred by many, allows students to study and complete the course in their own time. The support, coaching and feedback available to students makes it a number one for Internet Marketing Education.

Business Academy Online allows students to get a taster for Internet Marketing through the 7 part series available here at no charge:<http://www.businessacademyonline.com/InternetMarketingEd> ...

Students can then progress to try before they commit here: <http://www.businessacademyonline.com/internetmarketingtraining>

All in all, Business Academy Online is making online education more accessible for all.
