

InterSystems Named a Leader in 2019 Gartner Magic Quadrant for Operational Database Management Systems

InterSystems Recognised for Ability to Execute and Completeness of Vision

SYDNEY, Australia, December 3, 2019 – InterSystems, a global leader in high-performance information technology platforms that drive mission critical applications across healthcare, business, and government, today announced that Gartner, Inc. has recognised the company as a Leader in its 2019 Gartner Magic Quadrant for Operational Database Management Systems. InterSystems has been included in the annual report since 2013.

Last year, InterSystems introduced the InterSystems IRIS™ Data Platform, a complete, unified data platform that enables organisations to simplify and accelerate the development, deployment and maintenance of mission-critical and highly reliable applications. Its first specialised edition, InterSystems IRIS for Health, empowers healthcare organisations to rapidly develop the healthcare applications that manage the world’s most critical data, combining analytical and transaction processing with native interoperability for all data types.

“The InterSystems IRIS Data Platform powers some of the most high-volume, mission-critical and innovative applications across multiple industries — all of which require not only great technology, but also superior support and stability. As problem solvers, we continue to partner closely with our customers and application partners to expand these capabilities,” said Scott Gnau, vice president of data platforms at InterSystems. “We will continue to accelerate our investments in innovation, partnering and support. Our entire team appreciates the recognition by Gartner and our customers.”
