

Ionmax desiccant dehumidifiers top Choice consumer review for fourth consecutive year

Ionmax ION632 dehumidifier is Best Overall Performer, whereas Ionmax ION612 dehumidifier placed third

We are proud to announce that our Ionmax desiccant dehumidifiers have topped Choice Consumer Magazine's dehumidifier review for the fourth time in a row!

This is the fourth consecutive year that the Ionmax ION632 desiccant dehumidifier has been awarded the coveted top spot of Best Overall Performer, whereas the Ionmax ION612 desiccant dehumidifier was placed third.

Choice is a leading consumer advocacy group in Australia that conducts independent testing on products and services for the benefit of Australian consumers. They are Australia's largest source of expert reviews based on unbiased analysis and rigorous testing.

The Ionmax dehumidifiers were independently tested along with other dehumidifiers and scored based on several factors including water removal efficiency, energy efficiency, and ease of use.

A dehumidifier helps to reduce indoor moisture levels to help prevent mould and condensation. By lowering indoor humidity levels, dehumidifiers can also help to dust mite populations, heating bills (by drying the air) and creating a more comfortable indoor environment. Less humid air makes heating more efficient and also helps protect fixtures and fittings from damp.

As desiccant type dehumidifiers, the Ionmax ION612 and ION632 are capable of removing large amounts of moisture from the air efficiently, and are also able to bring indoor relative humidity (RH) levels to below 40%.

The Ionmax ION632 Dehumidifier is designed for performance and ease of use, and ideal for any home and office. Its various features make it an excellent solution to combating humid air and improving indoor air quality.

The Ionmax ION612 Dehumidifier helps to efficiently control the humidity of the air. Its quiet operation, energy-saving ability and silver nano technology make it perfect for the home.

Both units, especially the ION632, have been widely popular not just for home use, but also for industrial applications. Our customers use our dehumidifiers for basements, office spaces, warehouses, office store rooms, and during renovations.

Availability

Both dehumidifiers are available for purchase online and in-store at participating resellers.
