

It's time to Discover Spatial by eLearning

With a geospatial industry that's worth more than 300 billion dollars globally, there is obvious demand for its technology and services. But as complete newbie, where do you learn about this high-tech industry, or as experienced professional, how do you keep your skills up to date? Enter Discover Spatial – www.discoverspatial.com – the number one independent online geospatial training platform. From open source to commercial geospatial technology, Discover Spatial has it covered. Have you checked it out yet?

Interested in learning?

Enhance your resume and learn some great new skills through Discover Spatial's library of online courses. From ArcGIS to CartoDB to Google Earth, with more courses being added all the time, you will be able to develop your geospatial expertise in a flexible manner. These low-cost courses are delivered through easy-to-follow videos and additional content by expert trainers. A number of FREE courses are also now available, so sign up today and check them out at www.discoverspatial.com.

Interested in teaching?

Discover Spatial is always on the lookout for talented trainers. It is the ideal platform to sell or share your geospatial courses and reach a wide audience of students from across the globe. And with Discover Spatial staff taking care of hosting, website maintenance, content security, payments and marketing, all you need to worry about is developing great course content.

All your paid courses will follow a simple app store model, benefiting both you as the trainer and Discover Spatial. And in a special offer for new trainers who sign up by 31 January 2015, Discover Spatial is offering FREE hosting for free courses, helping you to get your content and your name out there.

So why not get on board now? To discuss the opportunities contact Discover Spatial at learning@discoverspatial.com.
