

# JG Vertical: Rope Access Specialists

## JG Vertical

JG Vertical uses state-of-the-art abseiling equipment to service buildings in a variety of ways. Some of these include the installation and certification of Roof Anchor Points as well as the design and supply of height safety systems.

JG Vertical's Rope Access Technicians are highly trained and certified according to Australian regulations with safety as a core priority, minimising the risk of Working at Heights and ensuring a high-quality service.

JG Vertical is always looking to expand the team with individuals who have expertise that will provide value to JG Vertical's clients. Careers in Rope access are difficult to find, but at JG Vertical you will receive the support and training that you need to realise your potential.
