

John Morris Group partners with Scanivalve Corporation in the ANZ region

Sydney, Australia – The Industrial Division of the John Morris Group announced today that it has signed an exclusive distribution agreement with Scanivalve Corporation as a new professional representative for Scanivalve's intelligent pressure and temperature measuring modules across Australia, New Zealand and South Pacific Islands.

John Morris Group is a privately owned, third generation family business spanning over sixty years. John Morris Group's Industrial Division has a growing team offering support and expertise in the test and measurement equipment supply markets. With a strong presence in the ANZ region, John Morris Group will strengthen the promotion of Scanivalve solutions and system portfolio to wind tunnel testing, wind engineering, wind turbine testing, gas turbine, automotive, flight testing and industrial pressure and temperature measurement test markets.

Addison Pemberton, President of Scanivalve Corporation, said "Our exclusive distribution agreement with John Morris Group is giving us great growth potential across many important markets in the ANZ region. John Morris Group's complete solution platform will place Scanivalve's brand in an extended leading position in the pressure and temperature measurement markets in the ANZ region"

"We are very excited to be partnering with Scanivalve in the ANZ region. Scanivalve's state-of-the-art Intelligent Pressure and Temperature instrumentation solutions will definitely expand our offering to many of our test and measurement customers." said Duncan McLeod, John Morris Group's Industrial Division Manager.

About John Morris Group

As providers of complete solutions for noise, pressure and vibration measurement and data acquisition systems, John Morris Group partners with the region's leading engineers and scientists to deliver solutions for the measurement of acceleration, force, load, pressure, shock, strain, torque, noise and vibration. John Morris Group has a proud family heritage spanning sixty years. We specialise in the supply, installation and servicing of technical instrumentation and consumables covering diverse industry sectors throughout Australia, New Zealand and the South Pacific region.
