

Kambrook is expanding its ceramic portfolio with a number of stylish new heating products, including the Ceramic Tower Heater.

The new heater is a smart, compact model offering impressive energy efficiency and affordably priced at \$99.95. Ceramic heaters are extremely energy efficient when it comes to heating, reaching the desired temperature quickly and maintaining an even temperature around the room. The Ceramic Tower Heater has two heat settings, designed to suit individual preferences, as well as auto and fan settings. These are displayed on a digital LCD screen and a remote control allows the temperature to be adjusted from the comfort of the lounge. The heater's 90 degree oscillating angle distributes heat easily throughout the room. The Ceramic Tower Heater features an 8-hour auto-off timer as well as Kambrook's ThermoGuard protection and tip-over switch for maximum safety.
