

Kambrook is invigorating its heating range with a brand new carbon fibre technology never before seen in Australian heating products.

The innovative technology has been used in Kambrook's new Carbon Tower Heater, resulting in a highly efficient product which provides instant warmth as soon as the unit is switched on. The heater's carbon element sends out safe infrared waves which are easily absorbed by the body and stimulate the circulation, ensuring everyone in the room quickly becomes warm. The Carbon Tower Heater offers two heat settings and oscillates 60 degrees to spread the warmth around the room. For maximum safety and peace of mind, the heater features a 3-hour auto-off timer as well as a cut-out switch should it be knocked over. The heater's carbon technology makes it more efficient to run than most heaters, with most of the electricity turned directly into heat. This technology also requires less electricity, using only 1000 watts, and the heating element has a considerably longer lifespan than a standard element. Kambrook Carbon Tower Heater (KCF200) - RRP \$199.95 Enquiries: 1300 139 798 / www.kambrook.com.au Media enquiries: Juliet Fisher or Kristine Snell, Write Away Communication + Events Ph: 02 9978 1400 / Email: juliet@writeaway.com.au; kristine@writeaway.com.au
