

L7 TRAINING ACHIEVES CISCO LEARNING PARTNER CERTIFICATION, PEARSON VUE NEXT

Systems integrator and IT consultants L7 Solutions aims to be Western Australia's number 1 technical trainer by 2015

L7 Training a division of L7 Solutions has achieved Cisco Learning Partner Certification.

Continuing the drive to become Western Australia's number 1 technical trainer by 2015, systems integrator and IT consultants L7 Solutions, invested \$60,000 to certify existing senior L7 Cisco engineers as instructors to achieve the ability to provide CCNA (Route & Switch), CCNA (voice), CCNP (Voice), CCNA (Security), CCNA (Wireless) & CCNP (Wireless) training.

Coupled with recent certifications as a Microsoft Learning Partner, ITIL & Prince2 Licensed Affiliate and EMC training reseller, L7 are looking to further bolster their offering with a Pearson Vue and Prometric Testing Centre established at their Perth Training facility by June 2011.

L7 CEO, Matt Sullivan said adding this capability further aligns L7 to their mission; "to partner with our clients so that they can experience the full service offering of L7 and realise improvements in their business". Already having established managed services, advisory and integration departments allows L7 Training to round off services nicely to provide end to end solutions from consultancy to training and post project support. "We have already filled our scheduled Cisco courses to capacity for the next quarter which an extremely positive sign for L7 Training" said Mr Sullivan.

L7 has been a Cisco partner since inception in 2004 and has enjoyed a strong partnership. Considered by many to be W.A.'s trusted Cisco partner. L7 holds numerous Cisco certifications, was awarded Cisco Commercial Partner of the Year in 2005, received the Gold Star for Customer Satisfaction Excellence in 2006 & 2008 and achieved Gold Partner Status in 2007. Excellent results in early Cisco Training sales would indicate that L7 are quickly transferring their Cisco strength to become a key player in Cisco Training space. For further information on Cisco Training or to register for a celebratory CCNA special email training@L7.com.au or visit www.training.L7.com.au.
