

## M.A. Cross Plumbing Creates Customized Roofing and Gutter Solutions

Cross Plumbing is a plumbing service offering unmatched plumbing service to customers in South Brisbane and Logan City.

Repairing a damaged roof is never a task that should be delayed. By the time that most individuals discover a roof leak, it's already done considerable harm to the integrity of the structure. M.A. Cross Plumbing specializes in roofing that keeps homes and businesses dry, along with gutters that aid in preventing damage to basements and foundations.

Roofs can sustain damage from high winds, nearby tree branches, hail, blocked gutters, and a former installation that was performed improperly. When water enters from the roof, it runs down to surrounding surfaces. With a blocked gutter, the water is forced under the eaves. Both situations can result in rotting of roof joists and other structural elements. There's also the potential for mold growth that can make people ill.

M.A. Cross Plumbing is a plumber Logan that's skilled in roofing repairs and replacements. The company is experienced in working with and maintaining all types of roofing materials, flashing, and wall cladding. The company offers custom solutions, along with free, no obligation quotes for all plumbing-related requirements.

The company also specializes in installing, repairing, and maintaining gutters. Many home and business owners consider a gutter system an unnecessary expense, but gutters perform an important function. When rain falls directly off a structure, it affects the surrounding soil and can result in cracking and heaving that damages basements and foundations. A plumber in Logan can install, repair, and maintain gutter systems, along with providing leaf-free guards that eliminate clogged gutters.

For eco-minded clients, M.A. Cross Plumbing can install rainwater tanks and storm water systems to harvest rainwater. Depending on where individuals are located, they can receive up to 2,300 liters of rain during a year. The plumber in Brisbane can create and install unique systems that collect Mother Nature's bounty so it can be used for a myriad of environmentally-friendly purposes.

M.A. Cross Plumbing has been an industry leader for over 30 years, providing traditional plumbing services, environmentally-friendly, and sustainable solutions that save time, money and resources. The company responds to emergencies and has maintained exceptional standards of excellence as a member of the Master Plumbers Association of Queensland.
