

# M. A. Cross Plumbing Outlines the Benefits of Using a Master Plumber

Cross Plumbing is a plumbing service offering unmatched plumbing service to customers in South Brisbane and Logan City.

Michael Cross, owner of M.A. Cross Plumbing, is committed to helping clients that want money-saving, sustainable, and eco-friendly solutions for their plumbing needs. One way he's accomplishing that is by using eco-friendly materials in works like drain cleaning and leak fixing solutions.

Michael Cross has been in the plumbing service industry for over 37 years now and is a member of the Master Plumbers Association for more than 30 years. You become a Master Plumber only when you pass certain examinations; you learn the best plumbing techniques and are able to demonstrate that you follow all guidelines while performing your duties.

Michael Cross, Owner of Cross Plumbing says, "We are licensed plumbers and drainers, we can supply environmentally sustainable plumbing and drainage solutions from the household to commercial properties. Our business has undertaken Green Plumbers training in water audit assessments for residential and commercial properties, waste water management and solar hot water systems. We are also experts in new homes and renovations."

M. A. Crossing Plumbing is located in Tanah Merah a suburb close to Brisbane city and they are able to travel all locations in the nearby vicinity. While Brisbane is of course the main location service point for the Logan plumber he also covers areas like Loganholme, Bethania, Riverdale Park, Kingston, Meadowbrook, Springwood and Park Ridge among other areas as well. The plumber in Logan conducts installation, repair and maintenance of all water and drainage systems. Clogged drains are one of the most common problems that the company addresses. The situation has the potential to interrupt commercial endeavors. It's equally disruptive for residential clients that need to prepare for school and work.

Thus it is highly important that when you have any sort of plumbing issue you use the services of a qualified master plumber. A master plumber is able to understand the root cause of the issue and fix the issue in a way that is the best method.

The master plumber will be able to gauge whether the problem can be fixed well or the problem is something that requires complete overhaul. M.A. Cross Plumbing offers free, no obligation quotes for plumbing-related needs to get drains and toilets flowing freely. The company is a one-stop resource for eco-friendly and cost effective solar hot water systems, along with roofing and gutters that aid in preventing damage to basements and foundations.

## About M.A. Cross Plumbing

Michael Cross is able to assist you with products and solutions that best fit your needs. We are fully qualified trades people and we are here to offer you sustainable solutions while delivering quality workmanship and expert advice. We've been a member of the Master Plumbers Association for more than 30 years. We were sponsors of the first Sustainable House Brisbane built at Seventeen Mile Rocks in 2007.
