

M.A. Cross Plumbing Specializes in Eco-Friendly, Sustainable Solutions

At Cross Plumbing we are a local plumbing service in Logan and Tanah Merah. With over 30 years in the business we are experienced enough handle all kinds of plumbing issues.

Michael Cross, owner of M.A. Cross Plumbing, knows that few things cause as much distress for home or business owners as a leaky roof, blocked drain, or plugged toilet. The company has been rescuing clients from their inconvenient and even dangerous plumbing emergencies for nearly four decades.

M.A. Cross Plumbing is committed to providing environmentally-friendly and sustainable solutions for clients. The company's team has undergone Green Plumbers training for water audit assessments, waste water management, and solar hot water systems. The solutions are economical and lessen clients' carbon footprint.

The Logan plumber conducts installation, repair and maintenance of all water and drainage systems. Clogged drains are one of the most common problems that the company addresses. The situation has the potential to interrupt commercial endeavors. It's equally disruptive for residential clients that need to prepare for school and work.

Even worse is a plugged toilet. It's inconvenient and presents a significant health hazard. Those that call upon the expertise of the plumber in Logan will receive prompt service for toilet systems. Toilets and drains can experience disturbances resulting from broken pipes due to tree roots, heavy vehicles driving over pipes, and older systems that have outlived their life expectancy.

M.A. Cross Plumbing is experienced in greywater systems, storm water systems, water pumps, taps and faucets, and rainwater tanks. The company provides drainage and plumbing systems for new homes and renovations.

The plumber Logan is also skilled in roofing, gutter systems, and leaf free gutter guards. The options eliminate the unpleasant task of cleaning the gutters, while ensuring that water is directed away from foundations and basements. Rain water runoff that falls close to the home can result in cracking and heaving that's expensive to repair.

M.A. Cross Plumbing offers free, no obligation quotes for plumbing-related needs to get drains and toilets flowing freely. The company is a one-stop resource for eco-friendly and cost effective solar hot water systems, along with roofing and gutters that aid in preventing damage to basements and foundations.

About M.A. Cross Plumbing

Michael Cross is able to assist you with products and solutions that best fit your needs. We are fully qualified trades people and we are here to offer you sustainable solutions while delivering quality workmanship and expert advice. We've been a member of the Master Plumbers Association for more than 30 years. We were sponsors of the first Sustainable House Brisbane built at Seventeen Mile Rocks in 2007.
