

M-Files and Iron Mountain Extend Partnership to the Asia Region

Intelligent information management platform accelerates enterprise digital transformation and remote workforce enablement

SYDNEY(AUS) – September 2nd 2020 – M-Files Corporation, the intelligent information management company, today announced the continued expansion of their strategic partnership with Iron Mountain, the storage and information management services company enabling digital transformation, to new geographical areas in the Asia region: Hong Kong, China, India, Malaysia, Philippines, Singapore, Indonesia, South Korea, Taiwan and Thailand.

The partnership is focused on helping businesses drive digital transformation by offering intelligent information management solutions to customers across multiple functions, including invoice-processing and general document management as well as contract asset and project management. It also offers support for business continuity and enables organizations to better manage the new demands of a remote workforce. A key benefit is the ability to cost-effectively unify and consolidate information across the organization with a strong foundation in data security, information governance and compliance, from early in the lifecycle to long-term records retention and destruction.

The joint solution offering also provides deep integrations with existing enterprise platforms and business applications — such as Google G Suite, Microsoft Office 365 and Teams, SharePoint and Salesforce — to provide unified workflows and access to information across the business within the core applications used daily.

"With its global recognition and strong presence across both large enterprises and mid-size organizations, Iron Mountain is ideally suited to leverage the M-Files intelligent information management platform to help companies accelerate their digital journey," said Scott Erickson, Senior Vice President, Worldwide Channel Sales at M-Files. "Our new partnership helps drive change for companies in all stages of their digital transformation, including those who still heavily rely on paper-based processes to those who are rapidly advancing on their digital progress."

"We are excited to collaborate with M-Files to deliver these solutions to our customers and users," said Wee Tee Hsien, Vice President, Digital Solutions Asia at Iron Mountain. "As content volume increases and the workforce landscape is more remote, our joint solution can help organizations to gain better control of content and information. Effective content management that is also simplified, secure and reliable is more crucial than ever to our customers' needs."

About Iron Mountain Iron Mountain Incorporated (NYSE: IRM), founded in 1951, is the global leader for storage and information management services. Trusted by more than 225,000 organizations around the world, and with a real estate network of more than 90 million square feet across more than 1,480 facilities in approximately 50 countries, Iron Mountain stores and protects billions of valued assets, including critical business information, highly sensitive data, and cultural and historical artifacts. Providing solutions that include information management, digital transformation, secure storage, secure destruction, as well as data centers, cloud services and art storage and logistics, Iron Mountain helps customers lower cost and risk, comply with regulations, recover from disaster, and enable a digital way of working. Visit <http://www.ironmountain.com> for more information.

About M-Files Corporation M-Files provides a next-generation intelligent information management platform that improves business performance by helping people find and use information more effectively. Unlike traditional enterprise content management (ECM) systems or content services platforms, M-Files unifies systems, data and content across the organisation without disturbing existing systems and processes or requiring data migration. Using artificial intelligence (AI) technologies in its unique Intelligent Metadata Layer, M-Files breaks down silos by delivering an in-context experience for accessing and leveraging information that resides in any system and repository, including network folders, SharePoint, file-sharing services, ECM systems, CRM, ERP and other business systems and repositories. Thousands of organisations in more than 100 countries use M-Files

for managing their business information and processes, including NBC Universal, OMV, Rovio, SAS Institute and ThyssenKrupp. For more information, visit www.m-files.com. M-Files is a registered trademark of M-Files Corporation. All other registered trademarks belong to their respective owners.
