

# Manage Pandemic Risks with The Covid-19 Risk Assessment Module

The purpose of the COVID-19 Reporting Module is to allow people to report either a suspicion of or actual COVID-19 illness. It is designed to facilitate effective communications to HR and provide advice to affected individuals based on government guidelines.

How does it work? Risks can be assessed by category eg health, financial, legal, and reputational. Once identified, risks are evaluated through risk rating. Control strategies are then evaluated and corrective actions assigned.

Viking Analytics provides a visual guide to your overall Covid-19 Risk Assessment Compare initial and residual risk ratings by category View risk assessments by status, assigned persons, and category. View actions assigned, completed and outstanding risk assessments by status, category and assigned persons.

Join a Webinar on June 2nd, watch a short video or request a quote <https://myosh.com/modules/covid-19-risk-assessments/>
