

15/09/2016. A new Australian company, Men's Botanics has launched its latest range of skin care for men, with products, that include Cleansers, Scrubs, Shaving Creams and Moisturisers, all products vitamin enriched and powered by nature.

Their aim is to help men get back to basics in their skin care regimen by providing the tools needed to repair, restore and protect men's skin from environmental damage and help combat weather beaten faces.

Inspired by the lack of "Quality" natural products on the market for men, Men's Botanics offers all men a safe, chemical-free alternative to putting their best face forward, many of the ingredients included in other products on the market include synthetics that have been created in chemist labs, which in some cases can do more harm than good.

Men's Botanics use a range of natural ingredients including Aloe Vera, Apricot and Grape Seed Extracts, Avocado Oil, Kakadu Plum and Green Coffee Bean Extract, just to name a few, all of these have known medicinal and therapeutic properties.

As a boutique manufacturer of men's skin care products, Men's Botanics strives to deliver exceptional products that keep the Australian man and their daily lifestyle in mind. In fact, the team behind Men's Botanics aim to develop specifically formulated men's facial care and men's shaving products that outperform others on the market to ensure they satisfy the needs of the Aussie Bloke who just want products that deliver.

Men's Botanics spokesperson said, "Skin care shouldn't be complicated. It should be simple and easily form part of a man's daily routine. That's why we developed Men's Botanics: it's skin care powered by nature, plus it's effective and easy to use."

They added, "We have designed our products so that they can be a part of a man's daily routine. We have even thought about our packaging. It's convenient and made from brushed aluminium bottles and jars, that not only protect our natural ingredients but can also be easily thrown in a man's gym bag, work bag or luggage, plus they even look good."
