

Myionu Launches TrueView - Ultra Fast GPS Tracking

1 Second tracking arrives in Australia

GPS Tracking Service Provider Myionu announced the launch of its brand new service called TrueView.

Myionu TrueView provides vehicle telemetry updates every Second reporting back their web based portal which can be accessed from anywhere in the world.

Along with the location of the vehicle, TrueView will deliver fuel usage based on manufactures consumption figures, vehicle speed and heading along with range of driver behaviour data including harsh breaking and excessive acceleration.

Paul Delaney GM of Myionu said "The TrueView service has been developed following an increased customer demand for even more detail than our current 1 minute and turn by turn packages".

Delaney continues "We see TrueView as a natural evolution in vehicle tracking. TrueView is available on the Telstra Next G network at \$49 Inc. GST per month including unlimited access and data costs"

Myionu customers can view the real-time data in a map format using Google as well seeing overview using a trip simulator which allows users to "fly" above the route at around 100 meters off the ground.

With so much data available Myionu TrueView is supported with a comprehensive range of management reporting along with rules based alerting platform.
