

Natuvion announces Strategic Partnership with Celonis

Natuvion announced a new strategic partnership with Celonis, a global market leader in Execution Management. Through this collaboration, Natuvion perfectly complements its core competence in data transformation. Celonis Process Mining und Execution Management allow Natuvion transformation experts to further improve business process analysis, optimization, and the transition to innovative technologies and platforms. Consequently, the approach to transformation becomes more intelligent, while execution gains in pace and efficiency.

Walldorf, Germany and Sydney, Australien – 28. Juli 2021: Celonis has already been an important partner of Natuvion since the successful introduction of Celonis for Consulting (C4C+). This program offers customers significant benefits when evaluating processes and improving data quality. Utilizing its analysis and monitoring capabilities, Celonis technology supported SAP S/4HANA migrations and proved a valuable tool in RPA implementations.

Moving forward, Natuvion will expand and develop its transformation portfolio in the area of Process Mining. As part of the Celonis for Consulting (C4C+) program, Natuvion has already begun integrating Celonis Execution Management System (EMS) into its consulting services.

C4C+ is a strategic initiative; its objective is to support customers and partners in achieving process excellence. The program is comprised of two phases. The first step, the analysis with Celonis Process Mining, results in identifying the potential for optimization. In the following step, the execution with Celonis EMS uses all its capabilities enabling customers to control and optimize core business processes.

Christian Schröfl, Natuvion APJ CEO and co-founder, and Certified Celonis Process Engineer himself, is delighted: "Celonis puts us in the best position to support our customers in their efforts to assess and streamline their business processes. Celonis Process Mining uses the data of existing systems and processes to document the issues and barriers during execution. Celonis EMS does not only identify these barriers, but also eliminates inefficiencies through the use of artificial intelligence and automation. Customers recognize the huge advantage: the direct impact on cost and revenue. That is why I enjoy these customer playback sessions with Celonis EMS so much. The C4C+ program offers immediate specific input to improve business outcomes".

Jack Basley, Celonis Market Lead - Australia & New Zealand, added: "When companies combine our market leading Execution Management System with the expertise of Natuvion, they accelerate transformation and significantly improve corporate processes".

1. About Celonis

Celonis is the global leader in Execution Management. The Celonis Execution Management System provides companies with a modern way to manage their business processes based solely on data and intelligence. The company pioneered the process mining category 10 years ago when they first developed the ability to automatically mine processes and find inefficiencies.

2. About Natuvion

Natuvion is a digital moving company. Our team does not transport tables, filing cabinets, or chairs. Natuvion moves business-critical data and processes from one technology platform to another. Typical Natuvion "relocation services" include data migration, data transformation, data quality, data integration, data privacy, data security, and data governance. Natuvion's data transformation experts are supported by DCS, a powerful, proprietary software solution developed in-house. Natuvion is a founding member of the new SAP S/4HANA Selective Data Transition Engagement Community. Featured in the Inc. 5000 and FT 1000 lists, the Natuvion Group is one of the fastest growing software and IT consulting companies.
