

Network Pacific Strata Management achieves an important award nomination for Industry Excellence

Commercial Innovation

The Australian based owners corporation management company, Network Pacific Strata Management, has been nominated for The Urban Developer's Awards for Industry Excellence in the Excellence in Commercial Innovation category.

This Award recognises the best of urban development from across Australia and New Zealand. The Urban Developer is Australia's largest community of property professionals.

According to Stephen Briffa, Managing Director of Network Pacific, "Innovation is one of our core values and we are always going above and beyond to meet our client's needs and the challenges of the industry". Network Pacific Group achieved over twelve nominations for excellence awards in the first half of 2019 and won an important national award early this year.

Tina Di Camillo, General Legal Counsel of the Group, says "industry recognition is very important. It means our team's efforts are recognised. This motivates our staff, and as we know, motivation is a key element for creativity, and creativity leads to further innovation".

The winners of The Urban Developer's Awards for Industry Excellence will be announced at a Gala Dinner at Howard Smith Wharves in Brisbane on 23 October 2019.
