

New Crestron Performance UI Empowers Integrators to Deliver Stunning User Experience on TSR-310 Remote

Revolutionary user interface integrates natively with Crestron Pyng® OS 2; delivers performance never seen before in a handheld remote

SYDNEY, Australia – January 10, 2018 – Crestron, a global leader in advanced smart home technology, have announced the release of the Crestron Performance UI, a completely new and revolutionary user experience designed exclusively for the TSR-310 handheld touch screen remote. The Crestron Performance UI integrates natively with the Crestron Pyng® OS 2 operating system, giving residential integrators unprecedented power to deliver stunning user experiences never seen before in a handheld remote. Integrators will also appreciate how the Crestron Performance UI dramatically reduces deployment time, thanks to minimal programming requirements. Crestron integrators can download the latest Crestron Pyng OS 2 update now to see how the TSR-310 UI instantly updates to the Crestron Performance UI. “Crestron smart home automation is already renowned for ease of scalability, high performance, and unmatched reliability,” said Michael Short, Global Residential Marketing Manager at Crestron. “Now, with the Crestron Performance UI, our residential integrators can also deliver an incredible user experience that takes virtually no time to configure. It’s the full package.”

More major new features and enhancements Among other new features, the Crestron Performance UI provides integrated media, lighting, shades, and climate control, along with quick actions. The user interface takes industry standard actions to an unprecedented new level, with smooth and stunning transitions and animations. The UI is pre-built, so no design tools are necessary. The voice command interface is built-in, as well, further simplifying configuration. Software support The Crestron Performance UI is supported in Crestron Pyng OS 2 via a simple OS update. About Crestron At Crestron we build the technology that integrates technology. Our automation and control solutions for homes and buildings let people control entire environments with the push of a button, integrating systems such as AV, lighting, shading, security, BMS and HVAC to provide greater comfort, convenience and security. All of our products are designed and built to work together as a complete system, enabling you to monitor, manage and control everything from one platform. Our products are backed by more than 90 fully-staffed offices that provide 24 x 7 x 365 sales, technical, and training support across the globe. In addition to its World Headquarters in Rockleigh, New Jersey, Crestron has sales and support offices throughout the U.S., Canada, Europe, Asia, Latin America, and Australia.
