

## New dermaviduals Anti Wrinkle Serum

Considering botox? Stop and try dermaviduals' Anti-Wrinkle Serum before you go under the needle. This miracle in a bottle, based on the principles of corneotherapy, contains para cress extract with amino acids to create an instantaneous and visible smoothing effect. Managing Director of dermaviduals, Simone Vescio, says, "The summer elements, increased exposure to air-conditioning and late-night Christmas parties can all play havoc on our skin cells. "When our skin barrier, also known as the stratum corneum, has been compromised, fine lines, wrinkles and uneven skin tone become more prevalent. But, there's no need to run out and get botox. Our Anti-Wrinkle Serum contains the active ingredient para cress containing spilanthol. Coupled with dermaviduals' delivery system, cells are repaired from the inside out for long term results, not just a quick fix." Key benefits and ingredients of dermaviduals Anti-Wrinkle Serum:

Para cress containing spilanthol (N-2-Isobutyl-2,6,8- decatrienamamide). Spilanthol reduces the muscle contractions of the mimic facial lines, and its relaxing influence causes a visible smoothing effect. Amino acids contained support the smoothing process by effectively retaining the skin moisture. dermaviduals uses only the highest quality ingredients. Fragrance free and won't irritate or cause breakouts. This festive season skin saviour is best used in conjunction with a complete dermaviduals prescription from cleanser, moisturizer, eye cream and now incorporating their deco cosmetics collection. It can be used as an additive to the dermaviduals DMS®-base creams or by applying to serum sparingly to target areas. dermaviduals is now available in over 115 clinics across Australia. The range now includes cleansers, serums, face and body moisturisers, bespoke mineral makeup. dermaviduals Anti-Wrinkle Serum RRP \$120.00 – [www.dermaviduals.com.au](http://www.dermaviduals.com.au)
