

NEW MATCH MAKING SERVICE DOMINATES CHILDCARE INDUSTRY.

On March 15th, 2021 the globe is set to see childcare done differently as Skildren launch the world's first new age childcare algorithm; set to innovate the babysitting industry for parents and carers alike, producing a babysitting match made in heaven!

Where parents want to see the childcare industry be subject to innovation in a modern world, our affordable subscription service, which can only be described as the dating app of parenthood, requires customers to sign up as either a parent or carer (Babysitter, Nanny, Au Pair, or tutor) and take an easy to use, 5 minute quiz determining the perfect match for the user. With subscriptions starting at \$9.99 AUD per month, to \$19.99 AUD per month, users will be able to find their perfect carer or job within minutes.

Unlike our predecessors that leave the consumer to do all the work for themselves, alongside an exponential price tag of between \$40-\$120 per month, Skildren challenges these old school websites both financially and operationally as we release a new age of childcare, that meets the needs of a twenty-first century parent.
