

## New Pro-Val Tiger Hi-Visibility nylon glove

Pro-Val supported glove, the hi-visibility Tiger nylon glove

RCR International are pleased to announce the launch of its latest supported glove, the Tiger Hi-Visibility nylon glove.

The Tiger glove is made from 13 gauge hi-visibility nylon with a grey latex palm providing outstanding grip, dexterity and feel. The latex also offers water resistant protection to the palm and fingers. The high quality nylon used in producing the glove is extremely breathable and lightweight, keeping hands cooler, with less perspiration and fatigue when worn for long periods of time. The back of the palm is high visibility yellow.

Manufactured to European and Australian standard EN388, the glove provides a good level of abrasion resistance and tear force, while continuing to provide comfort and dexterity.

Reusable and washable, the Tiger glove is excellent in industries and applications such as Warehousing, Plumbing, Materials handling and assembly, Shipping, Automotive, Engineering, Packing lines and Construction.

For more information regarding the Tiger glove or for our complete Pro-Val catalogue range please visit our website [www.rcr.com.au](http://www.rcr.com.au) or phone us on 03 9558 2020.
