

New Quantum Smoke Speed Freak Baitcast Reel

Quantum Smoke Speed Freak Baitcast Fishing Reel, best and affordable fishing reel, cheaper fishing reel, online fishing tackle store, fishing gear

The all-new Quantum Smoke Speed Freak baitcast reel features a screaming-fast 8.1:1 gear ratio—which rips in 35 inches (89cm) of line for every turn of the handle. It also features Quantum's new 'PTX' frame, designed to add rigidity while reducing overall weight, which is just 6.4oz (181g).

The new Micro Infinite ACS external centrifugal cast control has a 250-degree rotation, adding 13 new settings for an even wider range of control for precise adjustments. Plus, when casting, the new Smoke Speed Freak design disengages from the pinion gear completely, allowing the spool shaft to 'float' freely for zero friction, adding even more distance to your casts.

The Speed Freak baitcast reel includes the improved new CSC2 drag—an advanced system that uses a stack of carbon fibre, stainless steel and ceramic washers to deliver a silky smooth and impressive 25lb (11.3kg) of drag power. The reel design features 10 bearings and one anti-reverse bearing, plus a lightweight aluminium frame and gear-side cover, which removes quickly for simple maintenance.

The aluminium spool holds 170yd (155m) of 30lb braid and other features include an aluminium PT main gear and drive shaft, titanium-nitride coated line guide, spool tension click knob, soft-touch EVA handle knob, plus distinctive red trim.

Smoke Speed Freak baitcasters will suit lure fishers seeking better casting distance, a tough drag system and the versatility of the impressive 8.1:1 high-speed retrieve. Speed Freak spin reels are also available.
