

Nintex Named a 2020 Best Place to Work in Australia

MELBOURNE, 22 July 2020 - Nintex, the global standard for process management and automation, has announced the organisation has been honoured as one of Australia's Best Places to Work in 2020 based on recently published employee survey data from Great Places to Work, an independent research firm.

This year's Great Place to Work benchmarking study included nearly 40,000 Australian-based employees representing 124 companies. Designed to evaluate employee engagement and trust levels across Australian workplaces, the 2020 study process also provides visibility into how organisations are inspiring, inventing, and innovating with new initiatives whilst navigating through a changing landscape due to COVID-19.

"We're honoured to be recognised as one of Australia's best places to work which is especially meaningful in these unprecedented times," says Nintex Vice President of APAC Sales Christian Lucarelli. "At Nintex, we believe that people are most important. We care for our team members and treat each other with respect and consideration at all times, and it's also how we interact with every customer and partner who are part of our growing global Nintex community."

MD of Great Place to Work Australia Zrinka Lovrencic, adds, "The organisations in the study are leading the way amid the pandemic, demonstrating care for their employees, customers and communities during this challenging time. The COVID-19 pandemic is a challenge facing organisations across the globe, and it puts a premium on being a high trust people-first culture. We celebrate the companies that earned places on our 2020 Best Places to Work benchmarking study, and we hope this will inspire more companies to continue maintaining and building trust with their team members."

Nintex's mission is to improve the way people work with process management and automation software. IT, operations, power users, and process excellence professionals leverage the easy and powerful capabilities of the Nintex Process Platform (<https://www.nintex.com/process-automation>), every day to accelerate digital transformation by visually mapping and managing enterprise-wide business processes and automating work with drag-and-drop tools for workflow automation, document automation, and robotic process automation (RPA).

Founded in Melbourne in 2006, Nintex has more than 500 employees worldwide with more than a quarter of those based in Australia who are committed to serving the needs of more than 8,000 worldwide customers across public agencies and commercial enterprises in every major industry, like banking, financial services, healthcare and life sciences, technology, and manufacturing.
