

# NOVATA SOLUTIONS AND MONADELPHOUS WIN GLOBAL ENTERPRISE TRANSFORMATIONS AWARD

Novata Solutions, along with their client Monadelphous, have been named the OutSystems Global APAC Enterprise Transformation Award winner for 2020.

Against nine global companies, Novata Solutions and Monadelphous were today announced the winner of the prestigious OutSystems Global Enterprise Transformation Award. The Award recognises organisations and people that are successfully using OutSystems to build applications, portals or systems that eliminate paper-based or manual processes, break down silos and offer user-friendly front ends that integrate with core systems.

Monadelphous engaged Novata Solutions to develop “MonaWork”, a mobile and web based employee application designed to improve engagement with its workforce. This is a mobile solution and is accessible anywhere in the world.

Rinaldo De Paolis, Managing Director & Principal Consultant from Novata Solutions said,

“Working together to create this application in a short period of time of 8 weeks has been transformational and revolutionary with the speed in which this was able to be developed and deployed. This would have been unachievable without OutSystems.”

General Manager Maintenance and Industrial Services – Strategy and Innovation, Alastair Reid said “Feedback from our employees suggested they wanted better control and visibility over their work schedules, so it was important for us to find a technological solution that would do just that. We’re proud to be recognised, along with Novata, for the solution we’ve developed to date, and we have no doubt it will improve with time and as we incorporate employee feedback.”

## About Novata Solutions

Novata Solutions is Western Australia’s premier OutSystems partner – delivering innovative applications that rapidly advance clients digital transformations.

## About Monadelphous

Monadelphous are a leading Australian engineering group providing construction, maintenance and industrial services to the resources, energy and infrastructure sectors.
