

OneBlink adds Global Distribution via AWS Marketplace

Sydney, 5th April, 2021 – OneBlink, Australia's leading Low-code Application Development Platform (LCAP), was today admitted to Amazon Web Services (AWS) Marketplace.

Beginning initially with its LcS (or Low-code Suite) Starter Service, OneBlink can now provide customers a seamless transition from its 60-day Free Trial, to 'month-to-month' SaaS billing direct on their AWS account, regardless of where they are in the world. Prior to the initiative, software buyers would have had to contract separately with OneBlink for a subscription to LcS.

"OneBlink is proud to announce the launch of LcS in AWS Marketplace", OneBlink C.E.O Darren Besgrove said.

"As an Australian headquartered ISV we're excited about the expansion opportunities we can develop through AWS Marketplace, both across ANZ and those parts of the world where we don't have direct representation. Being aligned with AWS, we continue to innovate our product set and we're pleased to be part of the program."

Deepening the relationship with AWS, OneBlink adds Marketplace as yet another AWS achievement, coming on the back of its long-standing AWS competencies within Mobile and Government, and its inclusion in both AWS' Public Sector and SaaS Programs.

OneBlink joins more than 1,000 companies on AWS Marketplace for SaaS products.

About OneBlink

OneBlink is an Australian-headquartered ISV who has built its Low-code Application Development Platform on the back of AWS' global infrastructure, and has been an AWS Advanced Technology Partner since 2015.

Combining low/no-code smart forms, mobile and web app builders, with powerful developer-centric tools for integrations and workflow, IoT, API management, hosting and No-ops deployment, OneBlink is a proven solution for mid-large enterprises and government agencies seeking to digitally transform or optimise a range of business processes.

Beyond AWS accreditations for Mobile and Government, OneBlink was awarded Cloud World Forum's "Best Enterprise Mobility Solution - 2015" in London.
