

PAT CASH BRINGS MULTI-MILLION DOLLAR KETONE TECHNOLOGY FROM NASA ASTRONAUTS & NAVY SEALS TO AUSTRALIA

Ketone conference on Gold Coast Friday 23 March 2018

PAT CASH BRINGS MULTI-MILLION DOLLAR KETONE TECHNOLOGY FROM NASA ASTRONAUTS & NAVY SEALS TO AUSTRALIA

"Having researched and tested ketones extensively both on and off court, there's no question this pure fuel source will take the world by storm... from athletes seeking an extraordinary edge to everyday people optimising their human potential." Pat Cash - Wimbledon Tennis Champion

LEADING RESEARCHERS REPORT THE RELEASE OF THIS TECHNOLOGY IS THE MOST IMPORTANT DISCOVERY IN THE NUTRITIONAL WORLD THIS CENTURY

On Friday March 23rd, 2018 the world's top scientists, researchers & doctors are coming from all corners of the globe to the Gold Coast for the very first time in what is the biggest ketone symposium in the Southern Hemisphere. Champion athlete Pat Cash is one of the early adaptors of ketone technology joining these thought leaders who will educate VIP attendees on the power to optimize human potential simply by shaking something up in water, so absolutely anyone can experience it. A group of the world's top ketone specialists and thought leaders from multiple disciplines of health, wellness and fitness will gather for 3 days to discuss this scientific revolution with those lucky enough to acquire limited seats at the QT Gold Coast. Tickets are available from www.ketones.chargeaus.com

In 2009, the US Department of Defence funded \$12Million in scientific research to develop a superhuman performance fuel to transform NASA Astronauts and Navy Seals into fully optimised human machines by achieving a state of ketosis in less than 59 minutes. Dr. Dominic D'Agostino, PhD, assistant professor at the University of South Florida (USF) College of Medicine, is at the forefront of ketone research and is responsible for developing the technology in exogenous ketones. USF's research into ketones is the culmination of over 120 years of research into the effects in human optimization of having ketones elevated in the blood.

In September 2015, the world's first pure therapeutic exogenous ketone was released to the public for the first time in history. This patented formula was based on research performed on US Navy Seal divers to help soldiers get the benefits of ketones without having to follow a difficult carbohydrate restricted diet. This included fast and sustained energy, better memory, focus and cognitive testing, improved sleep quality, faster recovery from workouts and superior performance in physical activity. Now these benefits that were so attractive to the military and NASA are having a massive impact on everyday people of all demographics.

Doctors & health practitioners are describing this as a revolution because since the release of pure therapeutic ketone (PTK) supplementation to the market, everyday people are able to drink PTK once a day and fuel their body on a more efficient energy source that does not have the side effects of sugar and carbohydrates; all this without changing their diet.

Since then the research on ketones has spread to everything from physical performance, to neurological & mood disorders, to recovery from traumatic brain injury to everything inflammation related which is just about every disease or disorder known to man.

Internationally renowned escape artist Sam Powers executes life-risking stunts that would make Houdini turn in his grave, performing to packed stadium audiences of 50,000 suspended at heights of 140 feet. The deadly nature of Sam's stunt work requires razor sharp mental focus and peak physical condition at all times and he utilises the very same ketone technology as NASA Astronauts & Navy Seals to achieve this fully optimized superhuman state.

Sam Powers at 140 feet altitude performing the world's deadliest escape in a state of ketosis.

THE PANEL OF EXPERTS AT THE QT GOLD COAST 23-25 MARCH 2018

DR ANDRA CAMPITELLI N.D.

Doctor of Naturopathy, Ketone and Hormone Specialist

Dr Andi is one of the world's leading Naturopathic Physicians practising for 10 years. Her focus and treatment of practice has always been the ketogenic diet, i.e. low-carb, high-fat diet in the treatment and prevention of health conditions helping to optimise her patients' health.

DUSTIN SCHAFFER

A Decorated US Marine Veteran backed with a Bachelor of Science, Dustin Schaffer is one of the world's brightest minds and thought leaders in ketosis. He carries certifications from the following Associations: National Strength and Conditioning Association, CPR/AED Certified, Gravity Personal Training, EFI Sports Medicine, Muscle Activation Technique, Specialist, The BioSignature Method, and Certified Psych-K Health and Wellness.

DR BRIAN JOHNSON DC aka THE KETO DOC

Bsc - Biomedical Science at Texas A&M/Ancestral Nutrition & the Keto Diet Master

The Keto Doc has dedicated his life to educating people about the benefits of everything Keto since exogenous Ketones have become available on

the market.

CLIFF HARVEY

Naturopath, Clinical Nutritionist & Rockstar of the Ketone Research World

Cliff has worked with the top athletes & doctors in ANZ since the late 90's as one of the very first practitioners to begin prescribing and working with low-carb, high-fat (LCHF), ketogenic diets in the late 1990s.

KIM RUMBLE

Pharmacist & Founder – The Compounding Pharmacy Australia

Developer – The Happy Healthy Horny Philosophy

At the event, Kim will discuss how the rise of pure therapeutic ketones have changed the way she helps her clients, and how it is changing the nutritional supplement world.

JOE KETO

Nutritional Therapist & Leader of the Ketone Movement in Australia

Joe Keto (Rogister) is pioneering the movement in Australia.

"This is bigger than any diet. It's a movement and ketones are changing the lives of millions of people around the world. I've made it my mission to get ketones into as many brains and bodies as possible" says the Gold Coast local.

TO INTERVIEW JOE KETO, PAT CASH, SAM POWERS OR ANY OF THE EXPERT SPEAKERS please email max@marksonsparks.com or call Max Markson.
