

SYDNEY, Aug 16, 2017 – The recently announced acquisition by Pulse Secure, LLC ('Pulse Secure'), of Brocade's Virtual Application Delivery Controller (vADC) product family, will accelerate the company's already strong growth in Australia. Since its launch as an independent entity in 2014, Pulse Secure has invested significant resources into expanding its footprint across ANZ. Recently named SSL VPN Vendor of the Year at the 2017 Frost & Sullivan Asia Pacific ICT Awards, the company's ANZ business is accelerating rapidly, with quarter-on-quarter growth of more than 40 per cent consecutively for the past three quarters. "The acquisition of Brocade's technology will add significant new capabilities to the Pulse Secure Access Platform, allowing us to deliver a complete end-to-end solution designed to reduce cost and complexity, increase security, and delight users," said Don Tan, Pulse Secure's Regional Director of Asia Pacific. vADC technology will further strengthen Pulse Secure's leadership position in Secure Access Solutions by adding a virtual ADC portfolio with software and virtualisation capabilities supporting hybrid IT and Cloud deployments. Existing and new vADC customers will enjoy expanded support and R&D coverage. Don Tan said, "As Australia's new financial year begins, Pulse Secure feels upbeat about the IT market, where we see good buying sentiment. ANZ customers are more sophisticated in knowing their technology requirements, and they quickly see the value of total secure access across their workforce." Since stepping into the ANZ market in 2015, Pulse Secure has acquired more than 48 new logos, and counts more than half of the top 10 largest banks as customers. "We'll continue to drive this momentum by delivering secure access to a complete customer application portfolio, from legacy data center applications, to web, cloud, and even mobile applications," Don Tan adds. "Our partners remain a priority and we will provide them with the necessary tools to continue this upward trend." Channel Setup Pulse Secure's partners in ANZ include NTT, Netsol, Spark and Crystal Echo. Pulse Secure's Senior Director of Worldwide Marketing, Adam Jaques, is based in Sydney. About Pulse Secure Pulse Secure, LLC is a leading provider of secure access solutions to both enterprises and service providers. Enterprises from every vertical and of all sizes utilize the company's virtual private network (VPN), network access control (NAC), virtual application delivery controller and mobile security products to enable end-user mobility securely and seamlessly in their organizations. Pulse Secure was formed in 2014 from Juniper Networks' Junos Pulse business. Pulse Secure's mission is to deliver secure access solutions for people, devices, things, and services. www.pulsesecure.net Follow us at @PulseSecure on Twitter or visit us on LinkedIn and Facebook.
