

QUANTUM OF THE SEAS' CURRENT SINGAPORE SEASON EXTENDED UNTIL JUNE 2021

Innovative Quantum Class Ship Will Remain in Singapore and Continue to Thrill Guests with World-Class Amenities, Show-Stopping Entertainment and Gourmet Dining Experiences

10 February 2020 – Royal Caribbean International today announced the extension of the Singapore season for Quantum of the Seas, one of Asia's largest and most revolutionary ships. This follows the success of the safe cruises pilot programme, which launched in December 2020. With this extension, Royal Caribbean will deploy Quantum for an additional three months in Singapore between 22 March 2021 and 21 June 2021.

Singapore residents can continue to satisfy their feelings of wanderlust and enjoy fun-filled activities, next-generation entertainment and world-class dining on board one of Royal Caribbean's most groundbreaking ships. Now available for bookings, these 2-, 3- and 4-night Ocean Getaways will continue to operate with the same set of comprehensive health and safety measures in place, such as mandatory COVID-19 testing, reduced sailing capacity and strict physical distancing measures.

"We are thrilled to announce the extension of the sailing season and look forward to having guests experience first-hand our signature cruise vacation that has wowed local cruisers already, with many booking repeat visits," said Angie Stephen, Managing Director, Asia-Pacific, Royal Caribbean International. "Our close partnership with the Singapore Government has played an instrumental role in the success of these pilot cruises, and we remain committed to safeguarding the health and safety of our guests and crew during these additional sailings."

Holidaymakers of all ages can expect the same signature Royal Caribbean experience on their Ocean Getaway, while cruising with peace of mind. The global cruise operator has taken every effort to keep guests and crew aboard Quantum of the Seas safe through a comprehensive set of health and safety measures that adhere to the CruiseSafe Certification standards jointly developed by the Singapore Tourism Board (STB) and DNV GL[1]. For a full list of health and safety measures being enforced on board Quantum, visit www.royalpromise.com/singapore.

The ground-breaking Quantum of the Seas features unmatched innovations in onboard attractions, such as RipCord by iFLY, the first skydiving experience at sea; North Star, an engineering marvel that transports guests more than 300 feet above the ocean; SeaPlex, the largest indoor sports and entertainment complex at sea with bumper cars, roller skating and more; as well as the Bionic Bar powered by Makr Shkr—home to the world's first robotic bartenders. Guests will also get to enjoy a landscape of 18 restaurant concepts as vast and varied as dining in the world's most cosmopolitan cities, including specialty restaurants created with partner chefs such as Jamie Oliver.

Guests who book their sail-cation on Quantum of the Seas before 30 April 2021 can be assured of flexibility in their plans with Royal Caribbean's Cruise with Confidence program, which allows for changes and cancellations up to 48 hours before the cruise begins. For even greater peace of mind, included with the cruise are COVID-19 protections which include a 100% credit towards a future cruise should a guest or any member of their travel party test positive for COVID-19 during the three weeks prior to their booked cruise; or a full refund if a guest, or any member of their travel party, tests positive during their voyage. Royal Caribbean will continue to cover COVID-19 related costs up to \$25,000 SGD per person in the travel party for onboard medical costs, any required quarantine, and travel home.

[1] The certification programme is jointly developed by STB and DNV GL, a global classification body and recognised advisor in the maritime industry. The certification is benchmarked against global standards and protocols, as well as Singapore's national safe management measures and certification programmes such as SG Clean.
