

Referoo partners with Click-Recruit to integrate reference checking

Sydney, Australia, 20 October 2020

Referoo, Australia's leading provider of online reference checks, today announced it had integrated its reference checking technology with the Click-Recruit CRM/ATS solution from leading software company CTC People.

For Click-Recruit clients, this means Referoo's award-winning online reference checking services now directly integrates into their CRM/ATS solution, making it easy to add reference checks to the recruitment process and recording these references directly in Click-Recruit.

Referoo Co-Founder Neil Rose said of the partnership, "We are excited to provide Click-Recruit clients with the opportunity to automate their reference checking within their CRM/ATS. Click-Recruit has a strong base of clients, particularly in the Salesforce.com community. By using Referoo, they can now move the entire reference checking process online, dramatically reducing the time it takes to receive references."

Curtis Johnston, Managing Director of Click-Recruit, believes there is a huge benefit for Click-Recruit clients in integrating Referoo, "Click-Recruit is fully customisable, enabling our clients to build-in their recruitment processes and workflows within the ATS. We hope this integration will help further improve the recruitment process for them by automating reference checks within Click-Recruit."

Click Recruit clients can access the solution from Referoo. Visit www.referoo.com.au/clickrecruit for more information.

ENDS
