

Right Vision offers small-to-medium enterprises easy-to-manage all-in-one networking solution no IT manager required

Sydney, Tuesday, September 20, 2005 Niche IP distributor Zircon announces Right Vision to Australia. An Alcatel company, Right Vision brings SMEs a tailor-made solution to set up and manage their network and internet services. Dubbed the all-in-one internet appliance, Right Vision's Evolutive range makes it easy and cost-effective for SMEs to provide network configuration. Right Vision takes an "a la carte" approach to networking with its modular solution. Starting with the Evolutive Engine (hardware/server platform), customers choose which software packages (Evolutive Softpacks) they would like to make up their solution. There are two Evolutive Engines to choose from: Eye-box MAX NG series for SOHO and SMEs up to 25 users Eye-box ONE Premium edition for SMEs and larger accounts up to 300 users. Both Evolutive Engines come standard with the Secure Router Pack. Evolutive Softpacks can be added as and when they're needed. The other three Evolutive Softpacks are: Messaging and Portal Pack File & Print Server Pack Hosting & Database Pack. For example, companies can add a new service such as messaging without changing the hardware platform through one software pack quickly and easily. The Hosting Pack, which allows the Internet, Intranet or Extranet web sites to be hosted on the server, can be added when a company is ready to move in this direction. In the meantime, customers don't pay for what they don't need. The system comes pre-configured with simplified administration so it's simple and ready to use. There is no need to install operating systems or software applications. This means, for companies with no IT manager, network management has been simplified. It increases workers efficiency and provides an easy solution to access Internet services. Gwen John, managing director of Zircon said, "The small business server market is significant for Australia. Right Vision's Evolutive range delivers on the concept of providing not only a cost-effective solution, but one that is designed for a market that typically does not have an in-house IT manager. "The solution means Professional firms, such as solicitors accountants doctors and other highly concentrated businesses, can have the best possible IT Infrastructure but without the associated hassles and complexity." Hardware specifications Eye-box MAX NG series: VIA C3 1.0Ghz processor; 256 Mb RAM; 1210Gb 7200 HDD; RJ45 10/100 Mbps Ethernet cards; console port; PCI slots. Eye-box ONE Premium Edition: P4 Processor; 2 x 512Mb RAM; 2 x 120Gb HDD SATA 150 7200 rpm RAID 1; 2x 10/100/1000 Mbps Ethernet cards; console port; PCI slot; USB ports; VGA & parallel slot; 24xCD/8x DVD. It provides advanced reliability and higher performance and also benefits from a simplified configuration set up thanks to a new installation wizard. RAID 0 or 1 as well as a third disk dedicated to backups add to its appeal as a reliable and easy-to-use server. Availability Right Vision is available immediately from Zircon/Global Business Technology. Pricing starts at \$3,100 (SRP ex GST) for the Evolutive Hardware engine. -ends- About Zircon Zircon is a managed communications services distributor.
