

Secure Computing Completes Acquisition of N2H2, Inc.

Secure Computing Corporation (NASDAQ: SCUR), the experts in protecting the most important networks in the world, has announced the completion of its acquisition of N2H2, Inc. (OTCBB: NTWO.OB). N2H2 is a global Internet content filtering company. "N2H2 is an excellent fit with Secure," said Eric Krieger, Regional Sales Manager, Secure Computing. "This acquisition increases our market share and critical mass in the Internet content filtering marketplace. By combining the strengths and complimentary aspects of both companies, we will be able to offer customers more features, a wider range of Web filtering platforms and extended URL list capabilities. "N2H2 has proven success in delivering best of breed content filtering solutions to education, corporate and government customers," explained Krieger. "Combined with SmartFilter from Secure Computing, the industry's leading On-Box filtering solution, we will deliver to the marketplace the most comprehensive Internet content filtering solutions." N2H2 is distributed in Australia by iSeek, a Secure Computing value-add reseller. About Secure Computing Secure Computing (NASDAQ: SCUR) has been protecting the most important networks in the world for over 20 years. With broad expertise in security technology, Secure Computing develops network security products that help customers create a trusted environment both inside and outside of their organizations. Global customers and partners include the majority of the Dow Jones Global 50 Titans and the most prominent organizations in banking, financial services, healthcare, telecommunications, manufacturing, public utilities, and federal and local governments. The company is headquartered in San Jose, Calif., and has sales offices worldwide. For more information, see <http://www.securecomputing.com>.
