

Senquip Wins "Outstanding Startup" Award

Senquip recognised for driving innovation in the field of IoT in Australia

Senquip™ is thrilled to have been announced as winner of the Outstanding Start-up award at the 2020 Hunter Manufacturing Awards.

Last Friday evening, October 23, marked the 16th year of the prestigious Hunter Manufacturing Awards (HMA), recognising and acknowledging manufacturing in the region of the Hunter, Central Coast, and mid North Coast.

The night was a chance to celebrate the resilience of the local manufacturing sector in what has been an unprecedented year of disruption due to Covid-19, and showcase, profile and promote the hard work, diligence and ability of businesses to adapt to a changing environment.

"This time last year, we had wrapped up the 2019 event and looked forward to reconvening in February to kick off planning for 2020. Little did we know that 2020 would be a year, the likes of which none of us have ever experienced," HMA chairman Steve Smith said.

Senquip, a manufacturer of IoT Sensor Gateways for mining, infrastructure, transport, and industry believes in manufacturing in Australia. "The small amount more that it costs to manufacture high-tech goods in Australia is more than paid for in the quality and reliability achieved" said Norman Ballard, CEO of Senquip™.

Senquip™ manufactures Sensor Gateways that can connect to any industrial sensor and send the data measured to the Senquip Portal or a customer server or SCADA system.
