

Decorating by yourself can be a daunting task and with so many choices, it is easy to make mistakes. Interiors expert at [www.victoryblinds.com.au](http://www.victoryblinds.com.au) Stuart Clark has put together his top tips to keep in mind when designing your perfect sleep paradise.

#### Prioritize comfort

A bedroom's main purpose is to be as relaxing as possible so invest in the best mattress you can afford. Also, consider what pillow filling works best for you as they all have different pros and cons. For extra comfort consider getting a padded headboard which will make a big difference especially if you are someone who loves to read in bed.

#### Storage

A cluttered bedroom will make it harder to rest so it is best to keep the space tidy and organised. The best way to do this is to invest in a closed or hidden storage so everything is out of sight and tucked away. Also, make use of all areas and buy storage for under the bed.

#### Flooring

Rugs are a must for adding warmth and color to any bedroom that has hardwood flooring however if you choose a rug that is too small for the space it will stand out. A rug that is too large will also cause some furniture adjustments so make you measure and get a rug that fits perfectly.

#### Block the light

If you are sensitive to light, it is a smart idea to purchase curtains and blinds that have blackout linings. As light can still creep in around the edges, it is best to layer window coverings at windows for full coverage and to stop any chance of light bleeding through.

#### Include color

Many people believe color isn't welcome in a bedroom when decorating and stick to white and beige however if these aren't your vibe it will only make you miserable. Instead, maximalist patterns and throws can create a snug space, which you can't wait to enter every night.

#### Include your personality

It's important to add personality where you can in your home. Many people forget to include prints, patterns and beloved colors for a more clinical look. It's best to decorate your home with your favorite things so you can enjoy the space as much as possible.
