

SpaScriptions introduce new summer Superfoods gel masks

SpaScriptions are excited to introduce their new Superfoods Gel Face Masks to their ever-growing range of facial masks this summer. The new mask collection featuring key ingredients, blueberry, watermelon and avocado, has been developed by an expert team of researchers and chemists, combining advanced technology with high-quality ingredients, at an affordable price. The 15-minute facial therapy at home treatment masks help to restore dehydrated, tired skin to its former glory, is suitable for all skin types and readily available from spascriptions.com.au and Big W nationally. Erica Galea, Chemcorp International Marketing Director, the Australian Distributors of SpaScriptions says, "Our SpaScriptions brand has taken off in Australia since we launched it back in 2019. With at-home beauty solutions becoming more of a ritual than a treat these days, the new range of Ph balanced and hypo-allergenic masks will treat skin to the delicious benefits of Superfoods in lightweight, cooling wash-off gel masks that helps to improve the health and appearance of skin. The perfect addition to get through the warmer months, and they are so affordable!"

About the SuperFoods Gel Face Masks:

SpaScriptions Blueberry Gel Face Mask: A powerful facial treatment designed to improve the health and appearance of the skin thanks to the blueberries packed with antioxidants, Vitamin A, C & E for brighter skin.

SpaScriptions Watermelon Gel Face Mask: Designed to hydrate the skin and deliver essential nutrients. This power pack mask works to improve the health and appearance of the skin.

SpaScriptions Avocado Gel Face Mask: Rich in fatty acids that are essential to moisturisation, this avocado infused gel mask is formulated to rehydrate the skin and improve the appearance.

The new SpaScriptions SuperFoods Gel Mask pack of 3 masks + applicator is available at an RRP of \$19.99 now from spascriptions.com.au or Big W nationally. Follow them @spascriptions
